Mc Clay "DK" ..... September 18, 1961  
 Well No. 4 is located 1900 ft. from N line and 660 ft. from E line of sec. 34  
SW 34 18 30 NMPM  
 (1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
Hansen-Queen Blair New Mexico  
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3426.7 ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

 RECEIVED  
 SEP 20 1961  
 U. S. GEOLOGICAL SURVEY  
 ARTESIA, NEW MEXICO

We propose to drill a well to the Queen formation to approximately 3,100 feet. Surface pipe will be in the top of the salt section, approximately 600 feet, and cemented with fifty sacs of cement. Should the well be productive, we will set 5 1/2" casing and cement back to the base of the salt section.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
