Drill out CIBP & Re-perforate

13. Describe Proposed or Completed Operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

The Wiser Oil Company wishes to convert this well from TA status to water injection by drilling out the CIBP @ 3160' and re-perforating the existing San Andres/Grayburg perforated zone. This is an expansion of the Skelly Unit Waterflood Project which is pending before the New Mexico Oil Conservation Division.
