DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging logs, cementing points, and all other important proposed work)

This well has been temporarily abandoned for several years after testing water in the Paddock Zone. We request a continuation of this status, since it is anticipated that additional testing of the Paddock will be done. We are waiting on additional testing expected to be done in the area.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
