Puckett "A"
Well No. **19** is located **1345** ft. from **[N]** line and **1345** ft. from **[E]** line of sec. **24**
S 1/4 E 1/4 Sec. 24 **173** **312** **10111**
Maljamar **Eddy** **New Mexico**
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We will set approximately 600 feet of 8 3/8" casing and cement with 50 sacks. We will set approximately 4000 feet of 5 1/2" casing and cement with 350 sacks. We will drill with cable tools to a depth of approximately 4000 feet to test the San Andres formation, and complete through perforations. Authority to drill at this unorthodox location was granted by the New Mexico Oil Conservation Commission by their Order No. R-1693, dated June 10, 1960.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
