DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

We are still experiencing a water break-through problem in this water injection well. We propose to set a drillable retainer at about 3610' and squeeze perforations at 3662-3702 with 75 sacks of cement.
