17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

This well has been producing from San Andres perforation 3744-50', 3784-88', 3800-10'.
We propose the following work which has been approved by Order No. R-3952.

- 1) Move in and rig up workover rig.
- 2) Pull rods and tubing.
- 3) Run drill collars and tubing with 4-3/4" bit.
- 4) Drill out bridge plug at 3870' and clean out to TD 4000'.
- 5) Wash hole with acid. Pull tubing and bit.
- 6) Run 2-3/8" OD coated injection tubing, 5-1/2" Tension-Type packer (internally coated), and equip to inject. Set packer at approximately 3714'.
- 7) Load casing annulus with inhibited fluid.
- 8) Hook well up to injection system and begin injection.

This will be a water injection well for the Lea "D" lease, operated by Skelly Oil Company.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of setting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well sealed conditioned for final inspection looking to approval of the abandonment.
