13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) \*

The subject injection well has a packer depth set of 3384' With the equipment in the hole (but isolated by a packer), the tubing/casing annulus was pressure tested to 540 psi for approximately 30 minutes. The test was administered by Pate Trucking 11/25/94, and witnessed by Robert English (of Pate Trucking). A copy of the original pressure chart can be found on the reverse side of this notice. The original was sent to the NMOCD along with a copy of this sundry notice.

Given that the integrity of the casing of the subject well is intact, Texaco Exploration and Production respectfully requests temporary abandonment status. The Lea C and the Lea D leases will be sold to a different operator effective January 1, 1995.
