SECRET

1. The first of these is the fact that the system is not a simple one, but a complex one, involving many different factors and many different people. The second is that the system is not a static one, but a dynamic one, which is constantly changing and evolving. The third is that the system is not a closed one, but an open one, which is constantly interacting with the outside world. The fourth is that the system is not a linear one, but a non-linear one, which is characterized by feedback loops and other non-linear relationships. The fifth is that the system is not a deterministic one, but a probabilistic one, which is characterized by uncertainty and risk. The sixth is that the system is not a single one, but a multiple one, which is characterized by many different perspectives and many different interests. The seventh is that the system is not a simple one, but a complex one, which is characterized by many different factors and many different people. The eighth is that the system is not a static one, but a dynamic one, which is constantly changing and evolving. The ninth is that the system is not a closed one, but an open one, which is constantly interacting with the outside world. The tenth is that the system is not a linear one, but a non-linear one, which is characterized by feedback loops and other non-linear relationships. The eleventh is that the system is not a deterministic one, but a probabilistic one, which is characterized by uncertainty and risk. The twelfth is that the system is not a single one, but a multiple one, which is characterized by many different perspectives and many different interests.
