	<input type="checkbox"/> Water Shut-Off
	<input type="checkbox"/> Conversion to Injection
	<input type="checkbox"/> Dispose Water

(Note: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

During initial completion in 1957, the Vacuum zone in the O. H. interval 3502'-3600' was fracture stimulated and tested. A RBP was set in the 7" casing @ 3467'. The well was subsequently completed in the interval 3165'-3456'.

Avon plans to clean out to the top of the RBP, reperforate existing zones, acidize for scale damage, retrieve the RBP @ 3467', and cleanout to the original TD @ 3600'. It is anticipated the work will start 2/27/95.
