NOTICE OF INTENTION TO ABANDON WELL			

(INDICATE ABOVE BY CHECK MARK NATURE OF REPORT, NOTICE, OR OTHER DATA)

Well No. FRIESS is located 660 ft. from N line and 1980 ft. from W line of sec. 30 30

175 31E

175 31E

PREMIER 175 31E

(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Old total depth 2051. Pay sand 1971-2051. NR 7" casing run at 1971.
We propose to deepen this well from the present depth to a depth sufficient to test the Premier formation or to approximately 3100 feet.
This is a correction of report dated 3-12-56 in which application was made to deepen well No. 31 located on this same 40 acre unit. This application was in error.

Approval to deepen the above well is granted subject to the submittal of a drillers log from the old total depth to the new total depth, and a sample description log, and/or a copy of any electric logs or surveys run. Please notify this office prior to the setting and cementing of any casing.

U. S. Geological Survey.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
