*Stagnant*  
Well No. 1 is located 1980 ft. from N line and 1980 ft. from E line of sec. 31  
17 South 31 East N.M.P.M.  
(1/4 Sec. and Sec. No.) (Twp) (Range) (Meridian)  
Wildcat Eddy New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3710 ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Commenced moving-in cable-tool spudder on November 21, 1956, and began cleaning-cut old hole on November 24, 1956. Reached depth of 295 feet on November 29, 1956, but were unable to drill deeper because of junk casing in hole. Ceased operations on December 19, 1956.

Will re-plug and abandon by filling hole from present depth of 255 feet (hole caved from 295 feet) to surface, and by setting and cementing marker at surface.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

Company Ernest A. Hanson
