Attention: Mr. W. A. Gressett
Oil & Gas Inspector

Gentlemen:

With reference to your letter dated January 11, 1961,
regarding the location of the above captioned well;
please be advised that this work has been completed
and is ready for your final inspection for the ap-
proval of the plugging report on this well.

Yours very truly,

ASHMUN & HILLIARD, NO. 3 LTD.

Helen Stephens

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group and the experimental group. The control group was divided into two subgroups: the control group and the control group. The experimental group was divided into two subgroups: the experimental group and the experimental group.

[illegible]

Figure 1 shows a 2D hexagonal lattice of atoms. A central atom is labeled '1'. It is surrounded by six atoms in a hexagonal arrangement, labeled '2' through '7'. The atoms are connected by lines representing bonds. The diagram illustrates the geometry of the lattice and the specific atoms involved in the study.

[illegible]

Figure 1. Schematic representation of the experimental design. The subjects were divided into two groups: the control group (CG) and the experimental group (EG). The CG was divided into two subgroups: the control group (CG) and the control group (CG). The EG was divided into two subgroups: the experimental group (EG) and the experimental group (EG).
