

NEW MEXICO OIL CONSERVATION COMMISSION

Santa Fe, New Mexico

MISCELLANEOUS REPORTS ON WELL

Submit this report in triplicate to the Oil Conservation Commission or its proper agent within ten days after the work specified is completed. It should be signed and sworn to before a notary public for reports on beginning drilling operations, results of shooting well, results of test of casing shut-offs, result of plugging of well, and other important operations, even though the work was witnessed by an agent of the commission. Reports on minor operations need not be signed and sworn to before a notary public. See additional instructions in the Rules and Regulations of the Commission.

Indicate nature of report by checking below:

REPORT ON BEGINNING DRILLING OPERATIONS		REPORT ON REPAIRING WELL	
REPORT ON RESULT OF SHOOTING OR CHEMICAL TREATMENT OF WELL		REPORT ON PULLING OR OTHERWISE ALTERING CASING	
REPORT ON RESULT OF TEST OF CASING SHUT-OFF		REPORT ON DEEPENING WELL	
REPORT ON RESULT OF PLUGGING OF WELL	<input checked="" type="checkbox"/>		

Port Worth, Texas

December 5, 1945

OIL CONSERVATION COMMISSION,
Santa Fe, New Mexico.

Gentlemen:

Following is a report on the work done and the results obtained under the heading noted above at the Sunray

Oil Corporation Government (Foster)

Company or Operator

Lease

Well No. 1 in the

0 - SE - NE

of Sec. 34

T. 17S

R. 31 E

N. M. P. M.,

Wildcat

Field, Eddy

County

The dates of this work were as follows:

October 29, 1945

Notice of intention to do the work ☒ (was not) submitted on Form C-102 on _____ 19____
and approval of the proposed plan ☒ (was not) obtained. (Cross out incorrect words)

DETAILED ACCOUNT OF WORK DONE AND RESULTS OBTAINED

Filled hole with mud by circulating through 2" tubing; spotted 20 ex. cement thru tubing at 3900'; 20 ex. at 1950' and 20 ex. at 960'; left 960' of 8-5/8" casing and 248' of 10" casing in hole; bull plug in top of 8-5/8" casing with small valve in top.

Witnessed by H. A. Birdwell Sunray Oil Corporation District Supt.
Name Company Title

Subscribed and sworn to before me this 5th I hereby swear or affirm that the information given above is true and correct.

day of December, 19 45

Name J. F. Adkisson, Jr.

Position DIVISION ENGINEER

Representing SUNRAY OIL CORPORATION

Company or Operator

Address 1824 Fair Building

My Commission expires _____

Remarks: Well record Form C-105, enclosed. Plan for plugging this well was approved by U.S.G.S.

3. RESULTS AND DISCUSSION

The first part of the paper deals with the theoretical aspects of the problem. It is shown that the system of equations governing the motion of the particles can be written in a form which is convenient for numerical solution. The results of the calculations are presented in the following section.

The second part of the paper describes the experimental procedure. The apparatus used for the measurements is described in detail. The results of the experiments are presented in the following section. It is shown that the experimental results are in good agreement with the theoretical predictions.

The third part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.

The fourth part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.

The fifth part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.

The sixth part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.

The seventh part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.

The eighth part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.

The ninth part of the paper discusses the results of the experiments. It is shown that the experimental results are in good agreement with the theoretical predictions. The results are compared with those obtained by other workers in the field.
