STATE OF NEW MEXICO

THOMAS M. MCCLURE
STATE ENGINEER

OFFICE OF STATE ENGINEER

SANTA FE

August 5, 1940.

Mr. E. G. Minton, Jr.,
Artesian Well Supervisor,
Roswell, New Mexico.

Dear E. G. :

I am in receipt of the application for oil test of Martin Yates III to deepen oil test from 2350 to 2450 in SWSW Section 26, Township 18 South, Range 26 East.

The application states they are attaching the Notice of Intention to Deepen Well, as submitted to the Oil Conservation Commission. This notice was not attached and there is no record of it in the office of the Oil Conservation Commission.

Martin Yates III has a blanket \$10,000 bond on file with the Oil Conservation Commission but it is necessary for him to file Notice of Intention with them on each well, so that well will be covered by the bond.

Will hold this application until Oil Conservation Commission requirements are fulfilled.

Very truly yours,

(Signed)

Thomas M. McClure

TM:EM

State Engineer.
