Detailed account of work done, nature and quantity of materials used, and results obtained.

This well was drilled by Wilson Walsh & Sons in 1925 to a total depth of 3225'. Graridge Corporation is taking over this plugged well with intentions of re-drilling it with cable tools. It appears surface casing is not present, will set 300' of surface pipe and cement to surface. The Commission authorized re-drilling of this unorthodox location by Order No. 1-984-01. Graridge Corporation assumed operation of this property effective March 1, 1956.
