17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

This well has been shut in since June 1, 1986, in accordance with BLM approval for temporary suspension of production of a stripper well. The well has been returned to production as follows:

On May 19, 1988, acidized perforations at 4307-30 with 3,000 gallons of 15% acid, using 150# of rock salt + 150# benzoic acid flakes + 5 cubic feet of nitrogen/bbl. Treated at 3,000psi. at 8 BPM. Treatment was through 2 7/8" tubing with packer set at 4240'. After recovering load, 2 3/8" tubing was run to 4294' and well was put on pump.
