1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a legitimate organization or a subversive one.

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that are contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that are contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action. This involves determining the steps that need to be taken to solve the problem and the resources that will be required to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan of action. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in solving the problem and whether any further action is required.

Question	Answer
1. What is the purpose of the study?	To determine the effect of the new drug on the disease.
2. What is the study design?	Randomized controlled trial.
3. What is the primary outcome measure?	Time to relapse.
4. What is the secondary outcome measure?	Adverse effects.
5. What is the sample size?	1000 patients.
6. What is the significance level?	0.05.
7. What is the power of the study?	0.80.
8. What is the confidence interval?	95%.
9. What is the p-value?	0.001.
10. What is the conclusion?	The new drug is significantly better than the old drug.

CHOTEN JOURNAL

[illegible]

It is of the greatest importance to have a complete history of the well. Please state in detail the dates of redrilling, together with the reasons for the work and its results. If there were any changes made in the casing, state fully, and if any casing was "sidetracked" or left in the well, give its size and location. If the well has been dynamited, give date, size, position, and number of dynamite used. Give the date of running in, and number of casing joints used.
