(Field)

(County or Subdivision)

(State or Territory)

The elevation of the derrick floor above sea level is 3320 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, including points, and all other important proposed work)

We plan to drill a well to approximately 2,000 feet to test the lower San Andres formation. Our pipe program will be as follows:

Will set one joint of 8-5/8" casing on surface and drill to total depth; will run 4-1/2" casing to bottom, setting D.V. tool at approximately 1300 feet; circulating cement to the surface.

Work to be done by Shamrock Drilling Company, Artesia, New Mexico, using rotary rig.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
