LDY

Well No. 1 is located 990 ft. from N line and 2310 ft. from W line of sec. 26SE-NE-NW Sec. 26
(4 Sec. and Sec. No.)18S
(Twp.)25E
(Range)NMPM
(Meridian)Wildcat
(Field)Eddy
(County or Subdivision)New Mexico
(State or Territory)The elevation of the derrick floor above sea level is 3485 ft. GL

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

Intend to temporarily abandon this well after having reached a total depth of 1722 feet in the San Andres. Heavy mud will be placed from 1722 to 1150 feet. The San Andres "Artesian" water zone will be plugged off with a cement plug from 1150 to 1020 feet and 703 to 620 feet. Heavy mud will be placed from 620 to surface. A 8 5/8" metal cap will designate the site of the hole.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations are commenced.
