JAMES ANN FETTERAL

November 26, 1963, 19

Well No. **51** is located **2710** ft. from **N** line and **660** ft. from **W** line of sec. **3**  
**SW/4 NW/4 Section 3** **18-S, 27-E,** **H.M.S.M.,**  
 and Sec. No.) (Twp.) (Range) (Meridian)  
**MSD 1415** (Field) **MOY** (County or Subdivision) **NEW MEXICO** (State or Territory)

The elevation of the derrick floor above sea level is **3563** ft.

**DETAILS OF WORK**

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On November 26, 1963 we ran 2295' of 4-1/2" O.D. new casing, cementing same with 100 sacks **Encore 2** Pozmix and 50 sacks <sup>neat</sup> new cement. After cementing 4-1/2", we ran 1/2" tubing on the outside of the 7" casing and ran 200 sacks of Pozmix 4/8 gel, preceded by 50 sacks mud and 5 sacks cottonseed hulls. Cement came to the surface. Work was done by Halliburton.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.

JANE ANN FEDERAL

Well No. 41 is located 2310 ft. from ~~1000~~ [N] line and 640 ft. from [W] line of sec. 3

SW/4 NW/4 Section 3 18-N, 27-E, T.M.P.M.,  
(1/4 Sec. and Sec. No.) (Twp.) (Range) (Meridian)  
SUDY NEW MEXICO  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is 3563 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

On November 23, 1963 we ran 1450' of 7" O.D. casing, setting one D.V. tool at 679' and the second D.V. tool at 1004'. We ran one basket on the joint below each D.V. tool and circulated mud to surface. We ran 175 sacks of Incocon Permox with 50 sacks neat cement on the first stage. Second stage we ran 100 sacks Permox with 3 1/2 gal. We then ran temperature survey test and found the cement at 265'.

Will run 1/2" tubing on the outside of the 7" when we run 4-1/2" casing. Cementing work was done by Halliburton. Temperature survey run by Wellex.

U.S.G.S. representative was present at the time this work was done.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
