Puckett "A"  
Well No. 24 is located 25 ft. from N line and 1295 ft. from E line of sec. 24NE/4 NE/4 Sec. 24 17S 31E NMM  
( $\frac{1}{4}$  Sec. and Sec. No.) (Twp.) (Range) (Meridian)Maljamar (G-SA) Eddy New Mexico  
(Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is \_\_\_\_\_ ft.

## DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudding jobs, cementing points, and all other important proposed work)

It is proposed to drill this well with cable tools to a depth of approximately 4000 feet. We will cement 8-5/8" casing at approximately 575' with 50 sacks. The production string will be either 4 1/2" O.D. or 5 1/2" O.D. cemented at total depth with 250 sacks of 4% Gel cement plus 100 sacks of neat cement. Completion will be made by perforating casing and treating zones selectively. The well will be produced for a time and later will be converted to a water injection well.

This location is authorized under Commission Order #R-1693.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
