NEW MEXICO
(State or Territory)

The elevation of the derrick floor above sea level is 3563 ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

On October 25, 1963 we ran 2250' of 4" inserted log-drill pipe; cemented same with 40 sacks of portland and 20 sacks neat cement around the shoe.

We ran 320' of 1/2" pipe on the outside of the 5-1/2" casing and ran 70 sacks of portland. The cement came to the surface and fell back to approximately 100 feet. We poured the balance of the cement which we had from the surface.

Temperature logs are attached to this report.
