Marbob Energy Corp.
Drawer 217
Artesia, New Mexico 88210

Attention: Mr. John R. Gray

Gentlemen:

Permission is granted to return the Brainard Federal
Well No. 8 (5' FSL and 2635' FEL Section 34-T18S-R29E)
to active injection.

Injection is to be through tubing below a packer. The
injection pressure is not to exceed 425 psi unless a step
rate test will indicate injection at a higher pressure
will not fracture the injection zone.

Yours very truly,

JOE D. RAMEY
Director

JDR/fd
