November 26, 1963

H.C. Hudson-Carper Federal

Well No. 11 is located 1650 ft. from N line and 1650 ft. from W line of sec. 3
SE 1/4 NW 1/4 Section 3 18-S, 27-E H.M.P.M.
 (Field) (County or Subdivision) (State or Territory)

The elevation of the derrick floor above sea level is _____ ft.

DETAILS OF WORK

(State names of and expected depths to objective sands; show sizes, weights, and lengths of proposed casings; indicate mudlogging jobs, cementing points, and all other important proposed work)

We propose to drill this well to approximately 2350 feet to test the lower San Andreas.

We will set one joint of 10" and cement to surface. We will run approximately 1460' of 7" O.D. casing, placing one D.V. tool at approximately 1,000' and the second D.V. tool around 675'; cementing same to surface. We will run approximately 2350' of 4-1/2" new O.D. casing and run sufficient cement to tie the two strings together. Work to be done by Halliburton.

Well to be drilled by Technical Drilling Company, Midland, Texas.

I understand that this plan of work must receive approval in writing by the Geological Survey before operations may be commenced.
