17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The Mobil State #1 was spudded on 2-24-65. 8-5/8" O.D. surface casing was set and cemented at 310' with 100 sacks as per approved Form C-101 dated February 23, 1965. Total depth of 2950' was reached on March 8, 1965.

After running logs and evaluating core analysis results, it was decided that the primary reserves of this well did not justify completion at this time. However, a waterflood is contemplated off setting this well, and present plans are to run casing and complete when waterflood operations are initiated.

The well is temporarily abandoned.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
