17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed
work) SEE RULE 1903.

After calipering well, it was decided not to run a liner. Hole was plugged back to 1570' and squeezed w/150 sacks of Class C cement. WOC 72 hours, drilled cement and cleaned hole to 1800'. Pay zone 1630-1650' was treated thru straddle packers with 2500 gallons NEA and well put to pumping in October, 1977. We have not been able to restore oil production. The well is now proposed for plugging and abandonment. Will set a cement retainer at about 1200' and squeeze open hole with 75 sacks of Class C, displace hole with mud and spot 20 sacks plug at 550', 10' plug at surface with marker. $\frac{1}{2}/0$ $\frac{53c}{sac}$
