17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

We terminated water disposal in this well on or about November 1, 1977. All produced water from Penasco Draw is now disposed of in the Bob Gushwa SWD well.

On November 7, the internally coated tubing was pulled to be used in the Federal HJ #1 well, Linda (S.A.) in the near future. Tubing, pump and rods were run in the Gerard AW #2. We propose to return this well to producer status.

It is conceivable that some water may have back-flowed during the tubing job but our pumper didn't know, and our foreman is presently on vacation. We will have Johnny Morgan contact the OCC when he returns from vacation on or about January 2, 1978.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
