Re: Martin #4 O-15-18-26

A recent inspection of the subject P & A location showed the footage on the marker to be in error. Marker reads 550 FSL. It should be corrected to read 500 FSL.

It was also noted that an old tank battery near the location needs pit filled and junk removed.

Please notify this office when work has been performed and the area is ready for reinspection.

Sincerely,

A handwritten signature in cursive script that reads "Mike Williams".

Mike Williams
Oil & Gas Inspector
