17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

August 28, 1979 the purchase of make-up water was discontinued, dropping unit injection from 16,000 BWPD to 6,000 BWPD (produced water only). The injection wells in the west portion of the Unit were shut down immediately and as produced water volumes decreased additional wells were shut down. Injection for March 1980 was 4,450 BWPD confined to the east 40% of the Unit.

The result of this action and the lowering of surface injection pressures has caused the cessation of the water flow at this well. We have no injection within 1 1/4 miles of this well.
