Re: Simpson Well No. 2-N, 7-18-28,
Eddy County, New Mexico

Dear Mr. Welch:

On October 2, 1967, a field inspection of the subject dry hole was made. This inspection revealed the following work which must be done before the plugging report may be approved. The operators name, lease name, well number and location must be permanently placed on the marker, all wire and junk must be cleared from the location or covered, the deadmen wires must be cut, the pit must be filled and the location leveled.

Very truly yours,

OIL CONSERVATION COMMISSION

R. L. Stamets
Geologist
