Re: Costa Plente Gas Com Well
No. 1-A, ~~31~~³²-18-26, Eddy
County, New Mexico

Dear Sir:

On December 30, 1968, an inspection was made of the site of the subject dry hole. Said inspection revealed the following items which must be taken care of before the plugging report may be approved.

All junk on the location, including a number of bottles apparently dumped by the crew, must be removed from the location or buried. The dead-men bolts must be cut off or driven below ground level. The stakes holding the test line must be removed and the cellar filled.

When the required work has been completed and all necessary reports received, the plugging report will be approved.

Very truly yours,

OIL CONSERVATION COMMISSION
