Re: Multi-Point Back Pressure Test
Vandiver No. 1
Unit F, Sec. 13, T-18-S, R-25-E
Eddy County, New Mexico

Gentlemen:

The subject well went on line February 4, 1972. The well is currently producing 114 MCF per day. Attached is a daily production tabulation for the well. As can be seen from the tabulation, the well is very marginal. For this reason, Pennzoil United, Inc. respectfully requests the running of the Multi-Point Back Pressure Test as required by Rule 401 be waived.

If you need any additional information on this request, please feel free to call.

Yours very truly,

PENNZOIL UNITED, INC.
Western Division

J. C. Raney
