Allied State #1 was temporarily abandoned June 12, 1973 by shutting the well in. Production was no longer economical due to low oil production and high water cut.

This well off-sets Eastland production in the Power Grayburg-San Andres Pool and consideration is being given to a secondary recovery program utilizing Allied State #1 as an injection well.

It is requested that this well be placed on temporary abandonment status for a period of one year so that further study can be made.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
