(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

1. Spot sufficient cement across producing interval to tie back to production string casing seat, or set bridge plug near casing seat and cap with 25 sack cement plug.
2. Perforate base of salt @ 860' and squeeze with 50 sacks cement leaving 100' plug in casing.
3. Perforate top of salt @ 395' and squeeze with 50 sacks cement leaving 100' plug in casing.
4. Set 15 sack cement plug @ surface tying surface and production casing together.
5. Erect permanent well marker

Note: (a). Your office will be notified 24 hrs. prior to operations
(b.) All plugs will be verified
(c.) Hole will be loaded between all plugs with 10# Mud
(d) We do not plan to pull any casing

May not be able to squeeze through the two strings of casing if there is cement behind. So then just put plugs inside the 4 1/2" casing. P.W.C.

18. I hereby certify that the foregoing is true and correct
