- per office visit, D. Wolfenbarger will spot cmt. (100sx initially) on top of fish & "caved-in" formation @ ~ 1138'. Will tag & top up as necessary until TOC is at least 50' up into 8 5/8" csg. Depending on how much has been used up to that point, ARCO will either set separate 50' surf. plug, OR will fill 8 5/8" to surf.
