

7. Method of Handling Waste Disposal - All wastes including cuttings, garbage and trash will be disposed of in the drilling pits and be covered when the pits are cleaned up.
8. Location of Camps - No camps are planned.
9. Location of Airstrips - No airstrips are planned.
10. Drilling Rig Layout - Attached plat gives the position of the rig, mud tanks, reserve pits, pipe racks and access road location on the drilling pad.
11. Plans for Restoration of Surface - The surface included in the reserve pit and mud pits will be leveled. Other requirements of U.S.G.S. and N.M.O.C.C. will be complied with.
12. Other Information - The proposed well is in an old developed oil field. The well will be one of several proposed injection wells in a new waterflood that has been approved by the U.S.G.S. and N.M.O.C.C. The proposed location is in an area of sandy grazing land.

Your approval of this application will serve to help provide additional oil for energy at a time when our national energy supply is short.

Yours very truly,

M. F. Nelson  
Area Supervisor
