

NEW MEXICO OIL CONSERVATION COMMISSION  
PACKER SETTING REPORT

I, Eddie M. Mahfood, being of lawful age and having full  
Name of party making report

knowledge of the facts hereinbelow set out do state:

That I am employed by Yates Petroleum Corporation in the capacity of  
Engineer, that on March 28,, 19 74

I personally supervised the setting of a Baker Lok-set  
Make & type of packer  
in Yates Petroleum Corp., Federal "CZ",  
Operator of well Lease name

Well no. 1 located in the Undesignated (Lower Penn) field,

Eddy county, state of New Mexico, at a subsurface depth of

8248' KB feet, said depth measurement having been furnished me by

Vann Tool Company, Artesia, NM;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.
