17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Production from the Yeso perforations 2119½-2284½ has declined to 1 BOPD. We propose to set CIBP at 1530' and dump 10' cement on top of plug, then perforate and sand-frac Slaughter zone at 1376-1426' and put well to producing.
