Deviation Survey

Dear Mr. Gressett:

In searching our files we cannot find the Totco charts run on the above well. However on our daily drilling reports there is evidence that a deviation survey was run at 2030' with 1° deviation and another at rotary TD of 2600' with a deviation of 1/4°. We are confident the hole is straight because we ran 2600' of 7" pipe in this 7 7/8" hole in order to seal off a water zone.

Yours truly,

Fred G. Yates
