Re: Higgins Trust, Inc.
#1-H, 13-18-26
Eddy County, N. M.

Gentlemen:

We are returning the enclosed Forms C-101 and C-102 on the subject well for additional information

On Form C-101, show your blowout preventer program and attach a sketch of same. Further, the preventers must be installed when the 11-3/4" casing is set.

The shallow well located 660' south of this location is producing from the interval 1663-1816; therefore, the 8-5/8" probably should be set around 1900'.

On Form C-102, please outline each lease dedicated to the well and identify the ownership thereof (both as to working interest and royalty), and answer #3 on said plat.

Further, this well is located in a water basin and the cementing of the 11-3/4" and 8-5/8" will be witnessed by someone from this office. Minimum WOC time is 18 hours.

If you have any questions concerning this matter, please feel free to call upon me.

Sincerely yours,

W. A. Gressett
Supervisor, District II
