Gentlemen:

This is to advise that on April 21, 1986 the Hondo Drilling Company Alscott #1 gas well located in Unit G of Section 31, Township 18, Range 29, Eddy County, New Mexico was disconnected from El Paso Natural Gas Company's gathering system. This meter is blind plated and will remain on location temporarily, but inoperative until permanent status of the measuring arrangement is determined. The disconnection was due to gas being sold to Llano, Inc.

This information is incorrect. Hondo Drilling Company disconnected from your line December 1, 1985. This is not a gas well now but an oil well. Phillips 66 has tested this well but it is not producing any gas for sales, and if it were producing gas, we would be selling to Phillips.

Yours truly,
