17. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1903.

The Canyon zone (perfs 8905-9004) was abandoned by setting a CIBP at 8300' and dumping 12' cement on top of plug. Perforated 8175' w/4 holes and block squeezed w/250 sx Class "C" with retainer at 8004'. WOC 24 hrs, drilled retainer and cement 8096-8232'. Pressure test casing w/pkr @ 8045, had slow casing leak. Pumped 250 gallons 15% HCL @ 0.5 bpm and 2800 psi. Swabbed back load, swabbed dry with fair show of gas. Perforated Lower Wolfcamp at 8223-26, 8170-74, 8145-52, 8135-38, 2 jets/ft, total 34 0.50" holes. Swabbed & flowed cement, salt, water and gas. Ran bond log, found poor-to-no bonding above 8120'. We are now evaluating the feasibility of re-cementing and retesting.
