17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

We propose to temporarily abandon present Atoka and Morrow perforations 8212-8390' in order to test the Permo-Penn pays. We will set a standing valve in the Atoka packer, load the hole, set a retrievable bridge plug at about 6800', perforate the Cisco pays at 6447-60', 6554-64' and 6622-32', stimulate as needed for production. Will re-open the Atoka-Morrow completion after evaluating the Permo-Penn reserves.

18. I hereby certify that the foregoing is true and correct
