

drilling pad. The road will lie in a southwest-to-northeast direction as it crosses (a) a shallow drainage ditch adjacent to the existing access road, (b) a north-south fence, and (c) a north-south irrigation ditch. Beyond this latter point, the direction of the road will become south-to-north, until it reaches the drilling pad at the southwest corner of the pad.

- B. The new road will be 12 feet in width, except at its point of origin, adjacent to the existing access road, and at the point described in paragraph 2A, above, at which the direction of the new road will become south-to-north. At these two points, enough additional width will be provided to allow heavy trucks and equipment to turn.
- C. The new road will be covered with the necessary depth of caliche or riverbed gravel. The surface will be crowned, with drainage on both sides. No turnouts will be necessary.
- D. As indicated in the inset on Exhibit B, a 12-inch diameter pipe, 60 feet in length, will be installed, under the new road, in the drainage ditch alongside the existing road and will be covered with an adequate thickness of dirt and either caliche or gravel.
- E. A 24-foot cattleguard will be installed in the north-south fence, as indicated in the inset on Exhibit B.
- F. A 35-foot culvert will be installed across the north-south irrigation ditch, as shown in the inset on Exhibit B. This will be covered with an adequate thickness of dirt and either caliche or gravel.
- G. Mr. Tom Harrison, the rancher who has the grazing rights on the area affected by the new road, has cooperated in the determination of the road route and the other construction details, as outlined above.
- H. The center line of the new road has been staked and flagged, and the route of the road is clearly visible.

3. LOCATION OF EXISTING WELLS.

- A. There is no production within a two-mile radius of the proposed location. Dry holes have been drilled in sections 3, 4, and 9-T18S-R23-E. The nearest producing well was located in Section 19-T18S-R23E, but this well was plugged and abandoned in 1973. These locations are indicated in Exhibit C.

4. LOCATION OF EXISTING AND/OR PROPOSED FACILITIES

- A. There are no production facilities on this lease at the present time.
- B. In the event that the well is productive, the necessary production facilities will be installed on the drilling pad. If the well is productive of oil, a gas or diesel
