Energy and Minerals Department  
Oil Conservation Division  
P. O. Drawer DD  
Artesia, NM 88210

Gentlemen:

The multi point back pressure test on our Federal "F" Gas Com Well No. 1, located 1980' FNL and 1650' FEL, Section 3, T-18-S, R-27-E, Eddy County, New Mexico, was due on August 8, 1980. The subject well was connected to sales on June 10, 1980 and shut-in due to pressure depletion on June 24, 1980. The well failed to stabilize during flow period to enable us to run the test. The well is currently shut-in pending evaluation of recompletion or P x A. We request the subject well be removed from the test schedule.

Yours very truly,
