12. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

Operator rigged up cable tool rig October 13 and laid down pump & rods. Discovered well only had 1550' of tubing in hole. Picked up additional tubing and tagged at 1700', shut down rig. Did further research and found 9 5/8 CIBP was set but not reported @ 1700' with cement on top. An additional set of perforations are in the Penrose Sand at 1500'. After conversation with Tim Gumm with the NMOCD it was agreed that the operator would set a plug @ 1400-1300' and tag after WOC time. Cir hole w/ mud and set and tag a plug @ 416-316'. Then set 10 sx surface plug, cut off wellhead, set dry hole marker, cut off anchors, and clean up location.
