**U.S. GEOLOGICAL SURVEY
ARTESIA, NEW MEXICO**

1. EXISTING ROADS:

A. Exhibit A is a portion of New Mexico highway map showing the location of the proposed East Travis #1 well. The distance from Artesia, New Mexico to our well site is approximately 18 miles. To reach the proposed drillsite, travel east from Artesia on highway 82 for about 13.5 miles or until you reach highway 360 Turn south on highway 360 and travel for about 4.5 miles. Our proposed location is on the right hand (south) side of the road, an approximate distance of 200'.

2. PLANNED ACCESS ROADS:

A. Our proposed new road will be approximately 200' in length and will be 12' wide and 6" compacted caliche. Please see Exhibit B for details.

3. LOCATION OF EXISTING WELLS:

A. There are several existing wells in this section and they are so marked on Exhibit B.

4. LOCATION OF TANK BATTERIES, ETC.:

A. There are no tank batteries on this section.

B. In the event that we drill a producing well, all production facilities will be located on the pad that will be built. We anticipate finding gas and will not require power lines. Plat of production facilities are shown on Exhibit D.

5. LOCATION AND TYPE OF WATER SUPPLY:

A. Water will be obtained from commercial sources.

6. SOURCE OF CONSTRUCTION MATERIAL:

A. Caliche will be needed for the road and pad construction and will be obtained from a federal pit located in the SW/4 SW/4 of section 8.

7. METHODS OF HANDLING WASTE MATERIAL:

A. Waste will be buried in reserve pits at a depth of 24". The well site will be cleaned of all waste and this will be done within 30 days after completion of the well.

8. ANCILLARY FACILITIES:

A. None required.
