

7. H. All trash and debris will be buried or removed from the wellsite within 30 days after finishing drilling and/or completion operations.
8. ANCILLARY FACILITIES:
  - A. None required.
9. WELLSITE LAYOUT:
  - A. Exhibit "D" shows the relative location and dimensions of the well pad, reserve pits, and major rig components. The pad and pit area has been staked and flagged.
  - B. There will be some cutting on the south side of the pad and filled to the north, since there is a N/NW slope of 2-3' per 100'.
  - C. The reserve pit will be plastic lined.
10. PLANS FOR RESTORATION OF THE SURFACE:
  - A. After completion of drilling and/or completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the wellsite in an aesthetically pleasing a condition as possible.
  - B. Any unguarded pits containing fluids will be fenced untill they are filled.
  - C. If the proposed well is non-productive, all rehabilitaion and/or vegetation requirements of the Bureau of Land Managemnet and the United States Geological Survey will be complied with and will be accomplished as expeditiously as possible. All pits will be filled and leveled within 90 days after abandonment.
11. OTHER INFORMATION:
  - A. Topography: The land surface in the vicinity of the wellsite is gently sloping from 2-3' in a 100' to the N/NW.
  - B. Soil: The topsoil at the wellsite is a loamy clay with fractured limestone rock on the surface.
  - C. Flora and Fauna: The vegetative cover consists of very sparse miscellaneous grasses, mesquite, creosote bush along with other miscellaneous desert flowers and weeds. Coyotes and rabbits were observed in the area and other wildlife probably includes those typical of semi-arid desert land.
  - D. Ponds & Streams: There are no rivers, streams, lakes or ponds in the area.
  - E. Residences and Other Structures: There are no residences or other structures in the vicinity of the proposed well. There are other wells with tank batteries in section 23 to the east, with the closest tank battery within 1500 feet of the proposed well.
