17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Moved in service unit 9-8-81. Killed well with 60 bbl. 10# brine and 2% KCL water. Released packer and pulled tubing. Pumped 200 bbl. 10# brine and 2% KCL down casing. Ran gamma ray correlation log from 9600'-8000'. Ran cast iron bridge plug and set at 9350'. Perforated Morrow intervals 9348'-64' and 9460'-68' w/2 JSPF. Ran 2-3/8" tailpipe and packer with 2-3/8" tubing. Set tailpipe at 9254' and set packer at 9162'. Ran wire line and tagged fluid level at 8800' from surface. Acidized Morrow intervals 9348'-9468' with 3600 gal. 7-1/2% MS acid and 1000 SCF N2 per bbl. Recovered approx. 40 BLW. Flowed 998 MCF in 72 hr. Moved out service unit 9-14-81. Reconnected well to gas sales line 9-14-81. Placed well on production.

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between, and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
