17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

On April 21, 1981, we filed Notice of Intention to drill the Puckett "B" #29 well and included a surface use plan. The archeological survey was performed by Dr. J. Loring Haskell. These applications were subsequently approved by the BLM and U.S.G.S.

Drilling has been completed on the well, and the well will be ready to produce within a short time.

Several weeks ago, we requested CVE who furnishes electricity on the lease, to extend their system and connect electricity to this well. They now state that it will be necessary for us to file an amended surface use plan to show their line extension. We are attaching a copy of the CVE staking sheet which shows their present facilities and proposed extension in red. The nearest existing pole is approximately 660 feet to the northwest of the well pad as shown on sketch. It will be necessary to install 2 poles with 330 feet between poles. This area has been previously surveyed, and we request your authorization to proceed with the extension without any further archeological work.

Your earliest approval will be appreciated since we are being delayed in completing the wells.

18. I hereby certify that the foregoing is true and correct

Instructions

General: This form is designed for submitting proposals to perform certain well operations, and reports of such operations when completed, as indicated, on Federal and Indian lands pursuant to applicable Federal law and regulations, and, if approved or accepted by any State, on all lands in such State, pursuant to applicable State law and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 17: Proposals to abandon a well and subsequent reports of abandonment should include such special information as is required by local Federal and/or State offices. In addition, such proposals and reports should include reasons for the abandonment; data on any former or present productive zones, or other zones with present significant fluid contents not sealed off by cement or otherwise; depths (top and bottom) and method of placement of cement plugs; mud or other material placed below, between and above plugs; amount, size, method of parting of any casing, liner or tubing pulled and the depth to top of any left in the hole; method of closing top of well; and date well site conditioned for final inspection looking to approval of the abandonment.
